technospuma®

Tecnospuma, more than 40 years developing added value

Tecnospuma is dedicated to design, development and production of thermal and acoustic insulation products based on technical foams, felts, elastomers and self-adhesives, mainly for industrial markets such as Railway, Buses, Heating-Ventilation-Air Conditioning-Refrigeration systems, Home Appliances, Automotive and Construction.

Our Mission

Develop and produce innovative and sustainable solutions, increase the value of our customers, products, making them more efficient, comfortable, competitive and attractive for current and future market challenges.

Our Values:

01. Family Commitment

We maintain a family business environment where trust and personal commitment are essential.

02. Sustainability

We are dedicated to operating responsibly with the environment and our communities, ensuring a sustainable future.

Our Vision

We aspire to strengthen our position to lead the European market for thermal and acoustic insulation. We want to be easily recognized for our capacity for innovation, competitiveness and reliability. We aim to consolidate our international presence through sustained and strategic growth.

03. Transparency

We foster open and honest communication with employees, customers and suppliers, building lasting relationships based on trust.

04. Loyalty

We value and deeply respect the loyalty of our employees, customers and suppliers, ensuring fair and equitable treatment for all.

05. Integrity

We strive to keep our word and honour all our commitments, making effort and ethics the basis of our corporate culture.
